PROJECT	
TreeCity	Yes
Project Overview	The Town of Flower Mound was named after a native segment of the GreatAmerican Black Land Prairie that is known for its abundance of wildflowers. The vision of the town is to preserve our unique country atmosphere, heritage, and quality of life while cultivating a dynamic economic environment. This vision guides our policies, including the Master Plan, which prioritizes the preservation of our natural beauty and green spaces. Our Town's Strategic Plan further emphasizes environmental stewardship by including a goal and objectives to protect the Town's environment. Our project aims to enhance local green spaces by planting trees in five strategic locations. We will also create a guide for the Tree Species Selection List to help developers and residents pick native trees and care for them. We aim to cultivate a culture of tree appreciation and stewardship to ensure a thriving future for our green spaces and empower residents to be active participants in shaping our community's legacy.
Goals Objectives	Flower Mound's Strategic Plan prioritizes preserving its natural beauty and charming countryside character through its fifth goal of "Environment and Country Feel". Our residents consistently voiced the importance of the goal during various community feedback initiatives, making it a clear priority for our community. This Community Goal seeks to protect green spaces, maintain the Town's rural charm, and promote tree preservation to contribute to a high quality of life and a unique community character. The Plan also includes several objectives, the first of which is to, "protect and expand the Town's tree canopy". It includes three initiatives:1.1 Promote Environmental Education Programs/Events and Tree Planting Events 1.2 Evaluate Public Areas for Tree Planting 1.3 Increase Awareness of the Town's Tree Species Selection ListThe Town's project will carry out these initiatives by planting trees in five strategic locations and developing an guide for the Town's Tree Species Selection List.Additionally, our project will accomplish the following four items in order to receive 19 points toward completing the Tree USA Growth Award: D. Performing the WorkD5.

	Planting Site Evaluation: During the year, sponsors of community tree planting programs evaluated all proposed planting sites and matched tree species to planting sites based on those parameters.(3 Points)D1. Tree Planting Program: During the year, a new program was established for installing trees on public property. Program should integrate with the community tree planting plan.(8 Points)E. The Community FrameworkE13. Publications: During the year, the city published and distributed new or updated materials for the public about tree planting and care.(3 Points)E14. Publicity Campaign: During the year, the city partner launched a media campaign to inform citizens about the importance of community forestry, tree planting, tree care, or other important tree issues in the community.(5 Points)
Proposed Activities	Within the Town of Flower Mound’s Strategic Plan, there are several performance metrics that are tied to the completion of this project. These performance metrics include:- List of recommended locations for public tree planting on Town property- Number of trees to be planted- Creation of marketing materials for the Town’s tree species selection list- Update of the Town’s website- Number of visits to the Town Landscape and Tree Species web pageAdditional performance metrics for this program include:- Impact from the tree plantings on the Town’s urban tree canopy- Number of volunteers utilized during the tree plantings and number of hours- Value of the tree planting volunteers- Number of volunteers utilized during the educational campaign and hours- Value of the educational volunteers- Number of social media posts for the educational campaign- Impact from the paid social media campaign and digital campaign using geofencingFurthermore, we will be holding ourselves accountable by presenting this project to the Town of Flower Mound Town Council. We will also be utilizing funds from the grant to pay for a digital marketing campaign that will utilize geofencing technology to target our residents in an online campaign in order to increase the reach of our updated website and new tree publications. We anticipate the use of around \$3,500 for publication and advertisement. The additional funds for the grant will be utilized to purchase the trees for the tree planting projects, as well as irrigation supplies to provide these new trees with the water needed to help them get established in their forever homes. Each of these trees will be placed on public property in park land or protected areas to ensure they will be a forever home for the trees. We anticipate these costs to be around \$6,500 since we will be purchasing larger native trees.
Deliverables	May 2024 – List of planting sites will be completed and evaluated to determine the best locations for five tree planting projects within the Town of Flower Mound on public property. These sites will be selected based on their visibility to the public, benefits to the community, and the environment. This includes not only the site but also the trees that will be selected for planting. Every effort will be made to select trees that will help provide critical ecological services to the region they will be located in. July 2024 – Information on the Town of Flower Mound website will be updated and include a guide of the Town’s Tree Species Selection List that showcases a selection of recommended native trees for residents and developers.September/October 2024 – The five tree planting projects will occur during a time of year more favorable for transplanting success. November 2024 – A public awareness campaign will be launched to showcase the new public trees and direct residents to the online resources regarding how to select and plant native trees in the Town of Flower Mound. This will coincide with Texas Arbor Day so we can increase public awareness.Should any of these items not be completed in the deadline outlined, they will be continued until they are completed. The Town will also continue to use the list developed to select future tree planting sites in the following years. Some of the anticipated benefits/outcomes from this tree planting project and public education campaign include:• Ecological support within the regions the trees are planted;• Increased public awareness regarding how to properly plant trees, tree selection, and the services trees provide to our community;• Community aesthetics, because only tree planting locations that can be viewed from the public right-of-way on public land will be selected; and • Trees will be selected to help reduce the urban heat island effect and increase the tree canopy within the community.
Sustainability	The Town of Flower Mound plans to plant several native tree species around the Town on public

property in locations that are both beneficial to the residents and the ecosystem. We have created a list of potential planting sites but will be ranking the sites based on the following criteria: Visibility from the public right-of-way, accessibility to the public, contribution to the tree canopy, proximity to irrigation, proximity to other trees, and reduced heat island effect. By strategically planting these trees we increase the likelihood of their success and the impact they can have on their surrounding environment. We intend for these trees to support the ecosystem by providing essential habitat for local native fauna. These trees will also likely serve as a food source to many local wildlife. We plan to install irrigation to help the trees get firmly established and mitigate the effects that a harsh summer can have on trees in North Texas. We will also be selecting native trees based on the soil and ecoregions to increase their chance of survival.

Community Need Community Need: Our project's impact extends beyond mere beautification; it directly addresses a community need. This is important because, during a recent resident survey, 9 in 10 residents responded saying that the natural environment is important to them. Recognizing this, we will carefully choose public spaces for tree planting, ensuring everyone in the community benefits. The Dallas-Fort Worth metroplex is one of the fastest-growing communities in the country. At the rate of development, we are rapidly seeing our greenspaces and tree canopy decline, which is why it's more important than ever for our community to take intentional steps to not only protect our tree canopy but also enhance it. Our Master Plan prioritizes the Cross Timbers ecoregion. Cross Timbers Conservation Development District (CTCDD), is a unique treasure that defines our Town's character. This zone provides the Town with a unique country atmosphere and natural environment that is of great value to the community. The Master Plan has provided extensive measures to preserve this ecological zone with land use regulations that include environmental protection measures. In 2022, the Town of Flower Mound was recognized as a Bronze Leaf Award recipient by the Cross Timbers Urban Forestry Council for the Town's commitment to protecting the Cross Timbers ecoregion. The Urban Ecosystem Analysis was conducted in 2006 and it established a goal of 35% canopy coverage which is included in the Town's tree ordinance. Between 2014 and 2018, we saw a decline in the canopy from 27.1% to 23.6%. The canopy analyses indicate a decline in the percent of canopy coverage over the past several years. More work is necessary to meet our tree canopy goals.

Collaboration The Town of Flower Mound hopes to collaborate and partner with our residents and community volunteers to implement at least one of the planting projects. We are planning to utilize residents because they are so passionate about the trees in our community. Interested residents and volunteers will have opportunities to assist the Town with the tree plantings. We will also partner with our current volunteer pools, such as Citizen Foresters and the Texas Master Naturalists.
